Preventing and Addressing
Sexual Harassment in
Victorian Courts and VCAT

**Appendix 6 –
VEOHRC Data summary of
participant's experiences**

This Appendix summarises data from a survey completed by interview participants prior to their interviews with the Victorian Equal Opportunity and Human Rights Commission. People who had experienced or witnessed sexual harassment in Victoria's courts and VCAT were invited to share their story as part of the Review of Sexual Harassment in Victorian Courts, over a six-week period in 2020. The purpose of the survey was to gather basic demographic details and an overview of the types of harassment experienced by interview participants.

Please note that some interview participants may have chosen not to answer all questions when they completed the survey. This means that the number of participants represented in the graphs and tables below will generally be less than the total number of participants who contributed to the research.

Experiences of sexual harassment

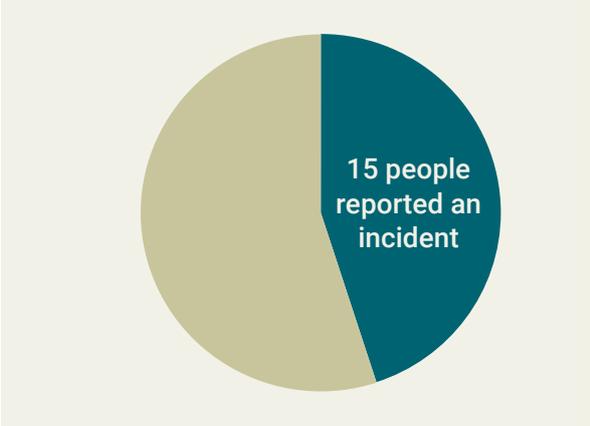

Of the 36 total participants, 28 reported that they had experienced sexual harassment, with 23 further reporting that there had been multiple incidents; 21 reported witnessing sexual harassment with 18 reporting witnessing multiple incidents.

The table below shows the types of harassment behaviours that participants reported experiencing/witnessing. Note that participants could report multiple types of behaviour, so the column totals will add up to a number higher than the total number of participants.
